

GAHNA VISHNANI

Computer Science Student | Software Developer

+91 9569888301 | gahnavishnani@gmail.com | [linkedin.com/in/gahnavishnani](https://www.linkedin.com/in/gahnavishnani) | github.com/gahnavishnani

PROFESSIONAL SUMMARY

Computer Science and Engineering student graduating in 2027 with hands-on experience in software development, backend engineering, API integration, workflow automation, and application troubleshooting. Proficient in Python, JavaScript, TypeScript, SQL, FastAPI, Node.js, React.js, and Apache Airflow, with experience building and debugging scalable full-stack applications and automated workflows. Led a cross-functional team of 6 interns to design and deploy a full-stack application, demonstrating strong ownership, collaboration, and problem-solving skills. Recognized through competitive hackathons, including securing 3rd position at Hacksprint 2025 and qualifying for the NxtWave OpenAI Academy Buildathon. Strong foundation in Data Structures & Algorithms, Object-Oriented Programming, and software engineering practices.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript, SQL

Computer Science Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, Problem Solving, Software Engineering Principles, Requirements Analysis, Solution Design

Backend & Web Development: Node.js, Express.js, FastAPI, RESTful APIs, React.js, Next.js

Databases: PostgreSQL, MySQL, MongoDB, Relational Database Theory

Cloud & Automation: AWS S3, Apache Airflow, Docker, Workflow Automation, Integration Engineering

Developer Tools: Git, GitHub, Postman, Jira

PROJECTS

Sukhi-Suvidha | React.js, Python, FastAPI, HuggingFace LLMs, EasyOCR, gTTS

- Engineered an end-to-end OCR → LLM → text-to-speech pipeline that converts medical prescriptions into simplified explanations in 5+ Indian languages.
- Designed a modular, object-oriented FastAPI backend exposing RESTful APIs that integrate OCR, LLM inference, and text-to-speech services; optimized text preprocessing
- Automated manual prescription interpretation, reducing dependency on manual processing by 20%; used Git for version control throughout development.

GenEthix | React.js, Python, FastAPI, MongoDB, Machine Learning

- Developed a full-stack cybersecurity banking application using React.js and FastAPI, implementing backend services and RESTful API communication.
- Built API-driven workflows integrating machine learning models with Python and Joblib for application-level analysis.
- Implemented SHAP-based model explainability to provide interpretable insights into machine learning predictions.

EXPERIENCE

Backend Engineer Intern

City.AI Pvt Ltd | Client: Workiva (US-based) | May 2026 – Sept 2026

- Modified and maintained backend data workflows across Snowflake, dbt Cloud, Airflow (scheduler), Fivetran, and Redshift, implementing business requirements, data backfills, and production pipeline changes.
- Identified unnecessary processing and optimized infrastructure costs by pausing 7 Fivetran pipelines across 23 Redshift tables, reducing Redshift-related expenses by 50%.
- Troubleshoot and resolved production integration issues across dbt, Airflow, Salesforce, and Gainsight by analyzing SQL, logs, and pipeline dependencies; worked with Data Engineers and Business Analysts to translate business requirements into technical solutions.

Python Full Stack Developer Intern

Wishwagon | Client: Critical-River | Feb 2026 – Apr 2026

- Developed and tested Python REST APIs (web services) powering React.js dashboards, writing optimized SQL queries and integrating backend services with frontend components.
- Automated a weekly timesheet-reminder workflow using Apache Airflow (scheduler) and MySQL, combining SQL-based validation with automated email notifications to employees with pending timesheets.
- Led a team of 6 interns, coordinating frontend, backend, database, and deployment tasks.
- Built data pipelines on AWS using containers and Jupyter/Databricks notebooks for data transformation and processing.

Full Stack Developer Intern

Arcoiris Logics | Jul 2025 – Sept 2025

- Developed and deployed full-stack features for a MERN social media platform (React.js, Node.js, Express.js) serving 250+ active users.
- Built and integrated RESTful APIs (web services) using Node.js and Express.js, with MongoDB for backend data storage and reliable client-server communication.
- Debugged and troubleshoot application issues with the team across frontend and backend, delivering responsive, user-focused features.

EDUCATION

B.Tech in Computer Science and Engineering

Uttarakhand Technical University | Roorkee, Uttarakhand
CGPA : 8.2

2023 - 2027

ACHIEVEMENTS & CERTIFICATIONS

- Selected among the top 20% of projects at a global AI Summit held in Delhi.
- Secured 3rd position in Hacksprint 2025, conducted by GDG x RIT; qualified Round 1 of the Nxtwave OpenAI Academy Buildathon 2025.
- Gen AI certified by Google; Contributor at GirlScript Summer of Code (GSSoC) 2025 and Open Source Contribution India (OSCI) 2025.
- Completed JPMorgan Chase & Deloitte virtual job simulations (Forage).
